upon request.

Why work with Yoder Lumber Company?

Yoder Lumber provides:

- Fair, honest, accountable dealings;
- Professional foresters with degrees in Forestry;
- Priority to landowners' needs and forest health;
- More than 70 years of experience in timber harvesting;
- Commission-free consultants to put more money in your pocket;
- Direct sale with one of the area's largest manufacture of Appalachian Hardwood Lumber;
- A written Forest Management Plan for tax reduction programs and future planning.

What happens before a Yoder Lumber timber sale?

Before every timber sale, Yoder Lumber will:

- Provide a free professional forester consultation to evaluate both land and timber;
- Establish and mark property lines with Geographic Information Systems (GIS) mapping;
- Mark to-be-harvested trees with paint around both the trunk and stump to ensure business integrity;
- Discuss all aspects of the harvest with the landowner;
- Share a proposal with the landowner detailing the value of their timber;
- Write and submit a final contract to the landowner for approval signatures.

During

Reclaimed

Contact one of our foresters to discover your forest's potential.

What happens at the time of harvest?

During each harvest with Yoder Lumber:

- Professional foresters supervise the entire harvest;
- A Master Logger harvests the timber;
- Master Logging crews utilize cable skidders and directional felling to prevent damage to residual trees;
- Best Management Practices (BMP'S) are used to prevent soil erosion;
- Safe and efficient timber harvesting is implemented;

Uncut forest.

What happens after harvest?

When harvesting is complete, Yoder Lumber:

- Conducts reclamation on all logging trails;
- Implements BMP'S to prevent soil erosion;
- Lops tree tops which remain in the forest to provide nutrients for the soil, contribute to the regeneration of new trees, and provide habitat for wildlife;
- Performs a final inspection to ensure all contract agreements are met and landowner is fully satisfied.

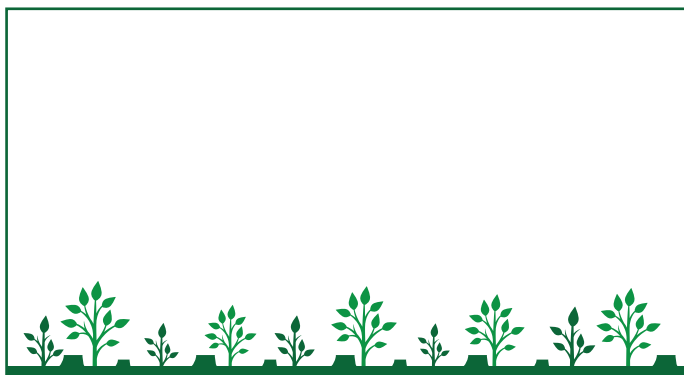

After single tree select harvest.

After group select harvest cut.

After shelterwood harvest cut.

After clear cut harvest.

After commercial clear cut or "high-grading".

Call or email one of our professional foresters to learn more about timber harvesting and to request a no-obligation consultation and free property review!
